MILK PRODUCTION, DISPOSITION AND INCOME, 1975

Cash receipts from marketings of milk and cream in 1975 reached a record high \$9.87 billion--4.5 percent above the previous high of \$9.45 billion in 1974. A slight decline in marketing of milk and cream was more than offset by higher prices. Producer returns from combined marketings averaged \$8.79 per hundredweight, up \$0.38 from 1974.

Milk production during 1975 totaled 115.5 billion pounds, practically the same output as the two prior years. Producers marketed 112.2 billion pounds (milk equivalent) compared with 112.3 billion pounds in 1974. Marketings include whole milk and producer-separated cream sold to plants and dealers, as well as milk sold direct to consumers.

Plants and dealers purchased 110.3 billion pounds of milk in 1975, slightly below 1974. Higher prices pushed dairymen's cash receipts in this category to \$9.61 billion--up 4.6 percent from the previous year. Direct sales to consumers amounted to \$249 million, up slightly from 1974. Returns from cream sales, at \$9.4 million, were down 5.3 percent from a year earlier.

An estimated 3.23 billion pounds of milk were used on places where produced, slightly less than in 1974. About 53 percent was consumed in producer households as fluid milk, cream, and butter, and the balance fed to calves.

1975 MILK PRICES AND FAT TESTS

Milk prices and fat tests for 1975 shown on pages, 3, 8 and 10 are revised where necessary for the United States, and for the following States: Alas, Ariz, Calif, Del, Fla, Ga, Haw, Idaho, La, Md, Miss, Nebr, Nev, N J, N Mex, Ohio, Okla, Oreg, S C, Tenn, Tex, Utah, Va, W Va, and Wyo. Revised 1975 milk prices and fat tests for the remaining States will be published in the July 1976 Agricultural Prices release.
